Create a new repository

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository.](#)
Required fields are marked with an asterisk ().*

1

General

Owner *

StrawverryIceCream

Repository name *

ROWBOT-system-design-repo

ROWBOT-system-design-repo is available.

Great repository names are short and memorable. How about [ubiquitous-waddle?](#)

Description

0 / 350 characters

2

Configuration

Choose visibility *

Public

Choose who can see and commit to this repository

Start with a template

No template

Templates pre-configure your repository with files.

Add README

On

READMEs can be used as longer descriptions. [About READMEs](#)

Add .gitignore

No .gitignore

.gitignore tells git which files not to track. [About ignoring files](#)

Add license

No license

Licenses explain how others can use your code. [About licenses](#)

Create repository

StrawverryIceCream / ROWBOT-system-design-repo
